

Dhanunjai Raghu Ram

Software Engineer — Full-Stack Developer — Generative AI Enthusiast
Khammam, Telangana, India — +91 9177952460 — 2200032009cseh@gmail.com
GitHub — LinkedIn

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in building full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Experienced in developing secure REST APIs, implementing authentication and authorization systems, and building scalable user-focused applications. Contributed to Generative AI initiatives involving prompt engineering, LLM fine-tuning, and AI-powered chatbot development. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and Software Engineering principles.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript
Core CS: Data Structures, Algorithms, OOPs, DBMS
Frontend: React.js, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs
Databases: MySQL
Generative AI: Prompt Engineering, LLM Fine-Tuning, QLoRA, AI Agents
Tools: Git, GitHub, Postman
Concepts: JWT Authentication, RBAC, Agile Development

EXPERIENCE

Frontend Developer Intern — Clothovia, Kolkata (Remote) Mar 2026 – May 2026

- Developed reusable React.js components for production applications, improving maintainability and code consistency.
- Integrated REST APIs and managed asynchronous data flows across frontend modules.
- Contributed to Generative AI initiatives through prompt engineering, AI agent workflows, and LLM fine-tuning support.
- Diagnosed and resolved frontend performance issues, improving responsiveness and user experience.

PROJECTS

AI-Powered Enterprise Knowledge Chatbot Apr 2026 – May 2026

Qwen 2.5, AWS SageMaker, QLoRA, Generative AI

- Fine-tuned the Qwen 2.5 1.5B Instruct model using QLoRA on AWS SageMaker to build a domain-specific enterprise knowledge chatbot.
- Created and processed 195+ structured question-answer pairs from product documentation for supervised fine-tuning.
- Designed training pipelines including dataset preparation, model training, evaluation, and testing workflows.
- Applied 4-bit quantization and LoRA adapters to reduce GPU resource usage while maintaining model performance.
- Utilized prompt engineering techniques and system prompts to improve response accuracy and domain specialization.
- Documented model architecture, training configuration, and evaluation procedures for team collaboration.

Online Grocery Delivery Platform Jan 2025 – Apr 2025

React.js, Node.js, Express.js, MongoDB, JWT

- Built a full-stack grocery delivery platform using the MERN stack with secure authentication and role-based access control.
- Designed REST APIs and optimized MongoDB queries for efficient product, order, and user management.
- Implemented JWT-based authentication and authorization for customers and administrators.
- Developed responsive user interfaces and integrated frontend-backend communication.

Real-Time Chat Application Aug 2024 – Nov 2024

React.js, Node.js, Socket.io, MySQL

- Developed a real-time messaging platform using Socket.io and MySQL for persistent chat storage.
- Implemented secure authentication and real-time bidirectional communication between users.
- Optimized database queries and indexing strategies to improve response times and scalability.
- Built reusable React.js components and responsive user interfaces.

EDUCATION

B.Tech – Computer Science Engineering 2022 – 2026

KL University, Vijayawada

CGPA: 9.4/10

Intermediate (MPC) 2020 – 2022

Sri Chaitanya Junior College

Score: 943/1000

CERTIFICATIONS

SQL Certification

- Query Optimization, Joins, Indexing, Relational Database Design.
